PROFILE

Software Engineer transitioning to DevOps. Building experience with Docker containers, AWS (EC2, ALB, Auto Scaling), GitLab, and basic GitLab CI/CD pipelines. Combining dev background with infra skills to automate deployments.

EXPERIENCE

Montran Corporation India, Ghansoli, Navi Mumbai

18/07/2022 – 30/08/2024

Assistant Software Engineer

Navi Mumbai

Responsibilities: Requirement gathering, planning, design, development, unit testing, bug fixing, deployment, production support, status updates to management and clients, and release note documentation for stage and production releases.

- Developed and maintained payment processing Systems (e.g., PFMS) for banking clients as part of a Java backend team.
- Used GitLab for version control: creating branches, staging changes, committing, rebasing with master, and pushing code for review and merge.
- Built WAR files and deployed Java applications on IBM WebSphere application servers for UAT and production.
- Worked with IBM MQ-based messaging in the application and helped troubleshoot issues related to inter-system communication.
- Supported UAT and production by investigating issues, fixing defects, redeploying updated builds, and coordinating with clients on verification.

Nutshell Infosoft, Nashik

30/01/2022 – 03/07/2022 | Nashik

Python Developer Trainee

Developed a medical portal using the Odoo framework to streamline healthcare operations, including patient management, appointment scheduling and billing.

EDUCATION

B.SC COMPUTER SCIENCE

10/11/2020 | Nashik

R.N.C. ARTS, J.D.B. COMMERCE, AND N.S.C. SCIENCE

CGPA:7.4

M.SC COMPUTER SCIENCE

16/09/2022 | Nashik

K.K. WAGH COLLEGE NASHIK

CGPA:8.5

TRAINING AND CERTIFICATIONS

RPA Developer Training

10/2025 | Pune, India

Automation Edge

covering fundamentals of RPA ,workflow setup, plugin usage, process/data automation, and introductory process orchestration.focused on web automation, loops, conditional logic, advanced plugin integration, and real-world automation scenarios.

TECHNICAL SKILLS

AWS: EC2, ALB, Auto Scaling | GitLab | Docker | Java 1.8+ | Struts, Spring Boot | SQL | JSP, HTML, XML | IBM WebSphere | IBM MQ

PROJECTS

CI/CD pipeline for Dockerized Python web app (Personal Project)

- Tech: Python, Flask, Docker, GitLab CI/CD, GitLab Container Registry, Git
- Containerized a simple Python Flask web API exposing a /health endpoint using Docker for consistent local and CI environments
- Built a two-stage GitLab CI/CD pipeline (build, test) on the main branch to automatically build Docker images from source code on each commit
- Configured the pipeline to log in to GitLab Container Registry, tag images with both commit-specific and latest tags, and push them to the project registry

PFMS (Public Financial Management Systems)

Clients: Kotak Bank, Bank of India, ICICI Bank

- Summary: PFMS is a transaction-based system to provide real time utilization of funds released from consolidated fund of India. It is facilitating Payments and Exchequer Control, Direct Benefit Transfer (DBT), Monitoring fund flow mechanism, Compilation of Accounts and Preparation of Fiscal Reports, and Dissemination of Information.

NEFT-NACH-APBS payments Systems

Clients: Kotak Bank, Bank of India

- Summary: NEFT, NACH and APBS payments are used for real-time settlement of fund transfers
